**$D20**

## Introduction

**The D20 Network Token**: Icosahedron (Symbol: D20) is a new utility token built on the **Polygon Network** that serves as an inter-network token for AI services, marketplace items, special rewards, and TTRPG (Tabletop Role-Playing Games) communities. With a **_total supply of 20 million tokens and 18 decimals_**, D20 provides users with a flexible and user-friendly solution for managing and using their digital assets.

## AI Services

D20 Network will provide AI services with a unified token that can be used to access and purchase a wide range of services. This includes, but is not limited to, natural language processing, computer vision, and predictive analytics. By using a common token, users can simplify the process of acquiring AI services and enable them to easily manage their assets within a single platform.

# TTRPG Games

The $D20 Token is designed to interact with TTRPG games(Table Top Roleplaying Games), providing a new and innovative way for players to enjoy their favorite social game experience with a little help from AI and the blockchain . The token can be used for a variety of purposes, including character creation, in-game purchases, and special rewards. With the integration of the D20 token, TTRPG games will become more accessible, engaging, and rewarding for everyone involved.

# Marketplace Items

D20 will also be used as a medium of exchange for a variety of marketplace items, including digital and physical goods, services, and more. With the ability to transfer tokens between different Network platforms, users can easily transact and trade their assets, leading to a more fluid and accessible marketplace for everyone.In addition to providing a medium of exchange, D20 tokens can also be used as special rewards for participating in various activities and events. Whether it is for supporting your local community game store or just chatting on the network.

Incentives and Staking
In addition to being used as a medium of exchange and reward, the D20 Token will also offer staking rewards to users who hold and support the network by holding and using the token on network. This provides an incentive for users to help secure the network, leading to a more stable and secure platform for everyone.

# Governance

The D20 Token will be governed by a decentralized autonomous organization (DAO), allowing token holders to participate in the decision-making process and help shape the future of the network. This empowers users to have a voice and take control of their investments, leading to a more transparent and democratic platform.

# Adoption and Distribution

The D20 Token will be available for purchase through various platforms, enabling users to easily acquire and trade the token. To encourage widespread adoption and distribution, the D20 team will also launch various marketing campaigns, community initiatives, and partnerships to raise awareness and drive usage of the token.

## Support

The D20 Token development team will provide ongoing support and resources to help users get the most out of the token. Whether it's through community initiatives, technical support, or educational resources, the team is committed to ensuring that users have a positive and productive experience with the D20 Token.

## Real World Applications

The D20 Token has real-world applications across a wide range of industries and sectors. In the AI services sector, the D20 Token can be used as a payment mechanism for various AI-powered services and applications, enabling users to easily transact and access these cutting-edge technologies. In the marketplace, the D20 Token can be used as a form of payment for goods and services, offering users a secure and convenient alternative to traditional payment methods.

In the gaming industry, the D20 Token provides a new way for TTRPG players to interact and engage with their favorite games. The token can be used as a form of in-game currency, providing players with a unique and immersive experience. It can also be used as a reward for completing quests or achievements, encouraging players to strive for excellence and keep coming back for more.

Furthermore, the D20 Token can be used as a reward for participating in various community initiatives and activities. By incentivizing engagement and participation, the D20 Token helps to build a strong and vibrant community around the token, providing value and utility to everyone involved.

## Security

The D20 Token is built on the secure and scalable Polygon Network, offering users a reliable and trustworthy platform for managing their digital assets. The network utilizes cutting-edge security measures, such as smart contract security audits and NFTvetting

In addition, the D20 Token also has a robust and transparent governance model, enabling token holders to participate in the decision-making process and help shape the future of the network. This helps to ensure that the platform is secure, reliable, and resilient.

## Usability

The Token is designed with usability in mind, offering a user-friendly and intuitive platform for managing digital assets within the network. The token's low transaction costs, fast and reliable transactions, and simple and straightforward user interface thanks to polygon. make it easy for everyone to use, regardless of technical experience or background.

In addition, the D20 Token also has a thriving and supportive community, providing users with a wealth of resources and support to help them get the most out of the experience. Whether it's through online forums, community-led initiatives, or technical support, the community is always there to help and support users in their journey.

## Partnerships

The Network is committed to forging strong and mutually beneficial partnerships with leading players in the AI services, marketplace, and TTRPG gaming industries. These partnerships will help to bring the benefits of the $D20 Token to a wider audience and provide users with access to new and innovative services and technologies.

Through these partnerships, the $D20 Token will be able to offer users exclusive benefits, such as discounts on goods and services, early access to new features and technologies, and special rewards for participating in community initiatives and activities.

In addition, the network is also committed to fostering a strong and active developer community, providing developers with the resources and support they need to build and integrate their own solutions on top of the $D20 Token. This will help to expand the token's use cases and bring even more value and utility to users.

# Future Development

Our team is committed to continuous development and innovation, bringing new and exciting features and capabilities to users over time. With a focus on usability, security, and scalability, the D20 Network will continue to evolve and improve, ensuring that the token keeps its relevance

*Some of the future developments planned for the D20 Token include:*

- Decentralized finance (DeFi) integrations, enabling users to access a wide range of financial services and products using the $D20.

- Integration with leading AI services providers, allowing users to easily transact and access cutting-edge AI technologies.

- Expansion of the token's use cases in the TTRPG gaming industry, including new and innovative in-game experiences for players.

- Development of new governance models and community initiatives, giving users greater control and influence over the future of the network.

- Partnership with leading exchanges and marketplaces, providing users with more options and opportunities to buy, sell, and trade the $D20.

*The D20 Token is designed to evolve and adapt over time, responding to the needs and demands of its users. The development team will continuously work to improve and add new features to the token and its underlying technology, such as new integrations with AI services and TTRPGs. The Token is built on open-source technology, providing users with a transparent and auditable platform. This helps to build trust and ensure that the network is secure and reliable for everyone. The open-source code also enables developers to build and integrate their own solutions. By they gaming related or not*

In conclusion, the future of the D20 Token is bright and full of potential.. The token is poised to bring new and exciting capabilities to users, providing them with a valuable and versatile tool for accessing and interacting with digital assets in the AI services, marketplace, and TTRPG gaming communities.
